

St Richard Gwyn Catholic High School

Healthcare Needs Policy

Approved by Governors on 22/01/2018

Signed (Chair)

‘Bear one another’s burdens, and they fulfill the law of Christ’

Galations 6:2

Introduction

At St Richard Gwyn Catholic High School, we believe it is our Christian duty to support pupils with healthcare needs. We believe that:

- Our pupils with healthcare needs should be properly supported so that they have full access to all areas for the curriculum, including trips and physical education
- Our Governing Body will ensure that arrangements are in place to support pupils with healthcare needs
- Governors and staff will always fully consider the healthcare needs of pupils when planning the curriculum

We are committed to putting the needs of those with healthcare needs at the forefront of our planning and development across school life. When developing arrangements and procedures:

- Staff should understand and work within the principles of inclusivity
- Lessons and activities should be designed in a way which allows those with healthcare needs to participate fully
- Staff should understand their role in supporting pupils with healthcare needs and appropriate training should be provided
- Staff should feel confident that know what to do in a healthcare emergency
- Staff should be aware of the needs of their pupils through the appropriate and lawful sharing of the individual pupil’s healthcare needs
- Whenever appropriate, pupils should be encouraged and supported to take responsibility for the management of their own healthcare needs

Life in school for those with healthcare needs can often be difficult. We aim to reduce those difficulties and strive for equity in opportunity and experience. The school is aware of its duty in relation to the legal requirements placed on it by the relevant acts, common law and guidance set out below

Legal Requirements

Section 175 of the Education Act 2002, places a duty on local authorities and governing bodies to make arrangements to ensure their functions are exercised with a view to safeguarding and promoting the welfare of children in school, or another place of learning. This includes supporting children with healthcare needs.

In meeting the duties under section 175 of the Education Act 2002, the local authority and the governing body **must** have regard to guidance issued by the Welsh Ministers under this section. Section 21(5) of the Education Act 2002, places a duty

on the governing body to promote the well-being of pupils at the school so far as related to the matters mentioned in section 25(2) of the Children Act 2004, which includes physical and mental health and emotional well-being, education, training and recreation, and social well-being.

The Governing Body of St Richard Gwyn Catholic High School fully accept the non-statutory advice contained within this document. This advice is issued in exercise of the Welsh Minister's duty to promote the education of the people of Wales and their power in relation to the promotion or improvement of the economic, social and environmental well-being of Wales.

Statutory duties on governing bodies of maintained schools

- In discharging their functions relating to the conduct of the school, the Governing Body of St Richard Gwyn Catholic High School will promote the well-being of pupils at the school. (Section 21(5) of the Education Act 2002). This duty relates to all pupils, including those with healthcare needs.
- The Governing Body will make arrangements for ensuring that their functions relating to the conduct of the school are exercised with a view to safeguarding and promoting the welfare of children (i.e. those under 18) who are pupils at the school (see section 175(2) of the Education Act 2002).
- The Governing Body recognises that it is also subject to duties under the Equality Act 2010 – see below.

Statutory duties on local authorities

- The Governing Body will work closely with the local authority to ensure all statutory duties are met.
- Local authorities have general functions in relation to providing education for their area (see in particular sections 13 to 14, 15A, 15B of the Education Act 1996).
- A local authority must make arrangements for the provision of suitable education (at school or otherwise) for children of compulsory school age who may not otherwise receive it for any period due to illness, exclusion from school or otherwise (see section 19(1) of the Education Act 1996). For young persons (i.e. those who are over compulsory school age, but under the age of 18), local authorities have a power (rather than a duty) to make such arrangements in those circumstances (see section 19(4) of the Education Act 1996). In determining what arrangements to make under section 19(1) or (4) in the case of any child or young person, the local authority must have regard to any guidance given by the Welsh Ministers.
- A local authority must make arrangements for ensuring that their education functions are exercised with a view to safeguarding and promoting the welfare of children (i.e. those under 18 – see section 175(1) of the Education Act 2002).
- Local authorities in Wales have a duty under section 15 of the Social Services and Well-being (Wales) Act 2014 to provide services in their area with the purpose of preventing or delaying the development of people's needs for care and support and a range of related purposes.

- Local authorities must make arrangements to promote cooperation between various persons and bodies. This includes a health board and NHS trust within the local authority area. The arrangements are to be made with a view to:
 - improving the well-being of children within the area
 - improving the quality of care and support for children provided in the area
 - protecting children who are experiencing or at risk of abuse, neglect and other harm (see section 25 of the Children Act 2004).
- The Education (School Premises) Regulations 1999 S.I. 1999/2 set out requirements (LA responsibility) regarding facilities at maintained schools. These include requirements regarding accommodation for medical examination, treatment of pupils and the care of sick or injured pupils (regulation 5).
- Local authorities also have duties under the Equality Act 2010 – see below.

The Equality Act 2010

Disability is a protected characteristic under the Equality Act 2010. Some pupils with healthcare needs may be disabled for the purposes of that Act; others may not be. There are various duties under the Equality Act 2010 which are relevant in the context of pupils with healthcare needs who are also disabled.

The Governing Body of St Richard Gwyn will not discriminate, harass or victimise disabled pupils and in some cases, other particular persons. The Governing Body is also subject to a duty to make reasonable adjustments (section 85 of the Equality Act 2010). Local authorities must prepare and implement an accessibility strategy in relation to schools for which they are the responsible body. This Governing Body will:

- increase the extent to which disabled pupils can participate in the schools' curriculums
- improve the physical environment of the schools for the purpose of increasing the extent to which disabled pupils are able to take advantage of education and benefits, facilities or services provided or offered by the schools
- improve the delivery to disabled pupils of information which is readily accessible to pupils who are not disabled.

The Governing Body of the school, with the local authority, will prepare and implement an accessibility plan. Such a plan involves the same content as an accessibility strategy, except that it relates to the particular school (paragraph 3 of schedule 10 to the Equality Act 2010). In relation to a maintained school and maintained nursery, the responsible body is the local authority or the Governing Body. In relation to a PRU, it is the local authority.

Local authorities and the governing body of local authority-maintained educational establishments (e.g. maintained schools) are subject to the public sector equality duty. This requires them, in the exercise of their functions, to have due regard to particular matters related to equality (section 149). They are also under specific duties for the purpose of enabling better performance of the public sector equality

duty (see the Equality Act 2010 (Statutory Duties) (Wales) Regulations 2011 S.I.2011/1064).

Social Services and Well-being (Wales) Act 2014

- The Governing Body of St Richard Gwyn give due consideration and fully accepts the provisions of the Social Services and Well-being (Wales) Act 2014.
- The Social Services and Well-being (Wales) Act 2014 ('the 2014 Act') is a single act that brings together local authorities' duties and functions in relation to improving the well-being of people who need care and support, and carers who need support. The Act provides the statutory framework to deliver the Welsh Government's commitment to integrated social services departments with a strong family orientation.
- From a Welsh policy and delivery perspective, the 2014 Act seeks to ensure that care and support provided to young people is delivered in accordance with the principles outlined in the UNCRC.
- Local authorities in Wales have a duty under section 15 of the 2014 Act to provide preventative services in their area. The purpose of these services would be to prevent or delay people developing a need for care and support.
- The 2014 Act was developed using the 'people model' which focuses on providing sustainable social services to people (being children, adults and carers) in line with their unique needs. This means that children are not treated in isolation but instead as part of families and communities. This has allowed the 2014 Act to provide a cohesive and more integrated care system.
- Well-being and the outcomes people wish to achieve are at the centre of the legislation; the definition of well-being in the Act, and the well-being statement, both recognise that securing rights and entitlements is key to ensuring that children can speak for themselves or have someone who can do it for them so that they are involved in the decisions that affect their life.

Common Law

The Governing Body of St Richard Gwyn understands and upholds its duties under common law. As part of the common law, those responsible for the care and supervision of children, including teachers and other school staff in charge of children, owe a duty of care to act as any reasonably prudent parent would when taking care of their own children. A person who is responsible for the care and supervision of children should do what is reasonable for the purpose of safeguarding or promoting the child's welfare. However, this is subject, for example, to a court order prohibiting certain steps being taken in relation to that child without the court's consent (section 3(5) of the Children Act 1989).

United Nations Convention on the Rights of the Child (UNCRC)

The Welsh Government is committed to the UNCRC as the underpinning basis for its policies concerning children and young people. The Governing Body of St Richard Gwyn fully supports this.

The approach outlined in this document is based upon and consistent with UNCRC provisions, which include that:

- children have a right to an education (Article 28)
- adults should think about the best interests of children and young people when making choices that affect them (Article 3)
- children who have any kind of disability should have the care and support required so that they can lead full and decent lives (Article 23)
- every child has the right to say what they think in all matters affecting them, and to have their views taken seriously (Article 12).

Roles and Responsibilities

Governing Body

The Governing Body of St Richard Gwyn will oversee the development and implementation of arrangements, which will include:

- complying with applicable statutory duties, including those under the Equality Act 2010 (e.g. the duty to make reasonable adjustments in respect of pupils with healthcare needs if they are disabled, as outlined above)
- having a statutory duty to promote the well-being of pupils. Schools should give consideration to how they can meet these needs, including providing pupils access to information and material aimed at promoting spiritual and moral well-being and physical and mental health (Article 17 of the UNCRC)
- considering how they can support pupils to develop the skills, knowledge and emotional resilience required to uphold their rights, and the rights of others
- ensuring the roles and responsibilities of all those involved in the arrangements to support the healthcare needs of pupils are clear and understood by all those involved, including any appropriate delegation of responsibilities or tasks to a Headteacher, member of staff or professional as appropriate
- working collaboratively with parents and other professionals to develop healthcare arrangements to meet the best interests of the pupil
- developing and implementing effective arrangements to support pupils with healthcare needs. This should include a policy on healthcare needs and where appropriate, IHPs for particular pupils
- ensuring arrangements are in place for the development, monitoring and review of the healthcare needs arrangements
- ensuring the arrangements are in line with other relevant policies and procedures, such as health and safety, first aid, risk assessments, the Data Protection Act 1998, safeguarding measures and emergency procedures
- ensuring robust systems are in place for dealing with healthcare emergencies and critical incidents, for both on- and off-site activities, including access to emergency medication such as inhalers or adrenaline pens
- ensuring staff with responsibility for supporting pupils with healthcare needs are appropriately trained (see '2.8 Training')

- ensuring appropriate insurance cover is in place, any conditions are complied with and staff are clear on what this means for them when supporting pupils
- having an infection prevention policy that fully reflects the procedures laid out in current guidance

The Headteacher

The Headteacher will ensure arrangements to meet the healthcare needs of their pupils are sufficiently developed and effectively implemented. This can include:

- working with the governing body to ensure compliance with applicable statutory duties when supporting pupils with healthcare needs, including duties under the Equality Act 2010
- ensuring the arrangements in place to meet a pupil's healthcare needs are fully understood by all parties involved and acted upon, and such actions maintained. In larger education settings it may be more practical to delegate the day-to-day management of a pupil's healthcare needs to another member of staff. The Headteacher should directly supervise this arrangement as part of the regular reporting and supervision arrangements
- ensuring the support put in place focuses on and meets the individual pupil's needs, also known as person-centred planning
- extending awareness of healthcare needs across the education setting in line with the pupil's right to privacy. This may include support, catering and supply staff, governors, parents and other pupils
- appointing a named member of staff who is responsible for pupils with healthcare needs, liaising with parents, pupils, the home tuition service, the local authority, the key worker and others involved in the pupil's care
- ensuring a sufficient number of trained staff are available to implement the arrangements set out in all IHPs, including contingency plans for emergency situations and staff absence
- having the overall responsibility for the development of IHPs
- ensuring that pupils have an appropriate and dignified environment to carry out their healthcare needs, e.g. private toilet areas for catheterisation
- checking with the local authority whether particular activities for supporting pupils with healthcare needs are appropriately covered by insurance and making staff aware of any limits to the activities that are covered
- ensuring all pupils with healthcare needs are appropriately linked with the education setting's health advice service
- ensuring when a pupil participates in a work experience placement or similar, that appropriate healthcare support has been agreed and put in place
- providing annual reports to the governing body on the effectiveness of the arrangements in place to meet the healthcare needs of pupils
- ensuring all pupils with healthcare needs are not excluded from activities they would normally be entitled to take part in without a clear evidence-based reason
- notifying the local authority when a pupil is likely to be away from the education setting for a significant period, e.g. three weeks (whether in one go or over the course of the academic year) due to their healthcare needs. Ultimately, what qualifies a period of absence as 'significant' in this context

depends upon the circumstances and whether the setting can provide suitable education for the pupil. Shorter periods of absence may be significant depending upon the circumstances

- being mindful of the Social Services and Well-being (Wales) Act 2014. Education settings should be fully aware of this approach and ensure assistance to pupils is provided using a holistic approach

Teachers and Support Staff

Appropriately trained staff within the school may be asked to provide support to pupils with healthcare needs, including supervising the administration of medicines. This role is entirely voluntary. Staff members must have received sufficient and suitable training and achieve the necessary level of competence before they take on the responsibility.

In addition to the training provided to staff that have volunteered, the school will ensure staff:

- fully understand the education setting's healthcare needs policies and arrangements
- are aware of which pupils have more serious or chronic healthcare needs, and, where appropriate, are familiar with these pupils' IHPs. This includes knowing how to communicate with parents and what the triggers for contacting them are, such as when the pupil is unwell, refuses to take medication or refuses certain activities because of their healthcare needs
- are aware of the signs, symptoms and triggers of common life-threatening medical conditions and know what to do in an emergency. This includes knowing who the first aiders are and seeking their assistance if a medical emergency takes place
- fully understand the school's emergency procedures and be prepared to act in an emergency
- ask and listen to the views of pupils and their parents/carers, which should be taken into consideration when putting support in place
- ensure pupils (or their friends) know who to tell if they feel ill, need support or changes to support
- listen to concerns of pupils if they feel ill at any point and consider the need for medical assistance (especially in the case of reported breathing difficulties)
- make sure pupils with healthcare needs are not excluded from activities they wish to take part in without a clear evidence-based reason, including any external trips/visits. This includes ensuring pupils have access to their medication and that an appropriately trained member of staff is present to assist where required
- are aware of bullying issues and emotional well-being regarding pupils with healthcare needs, and are prepared to intervene in line with the education setting's policy
- are aware that healthcare needs can impact on a pupil's ability to learn and provide extra help when needed
- support pupils who have been absent and assist them with catching up on missed work – this may involve working with parents and specialist services

- keep parents informed of how the healthcare need is affecting the pupil in the education setting. This may include reporting any deterioration, concerns or changes to pupil or staff routines.

Parents and Carers

It is vital that pupils and parents are actively involved in the planning of support and management of healthcare needs. Meeting the individual's needs should be at the centre of decision making and processes. The UNCRC states pupils should have access to appropriate information essential for their health and development and have opportunities to participate in decisions affecting their health. At St Richard Gwyn, our aim is that parents and carers should:

- receive updates regarding healthcare issues/changes that occur within the education setting
- provide the education setting with sufficient and up-to-date information about healthcare needs, including any guidance regarding the administration of medicines and/or treatment from healthcare professionals. Where appropriate, pupils should be encouraged and enabled to manage their own healthcare needs
- be involved in the creation, development and review of an IHP (if any). The parent and pupil may be best placed to provide information about how their healthcare needs affect them. They should be fully involved in discussions about how the pupil's healthcare needs will be met in the education setting, and contribute to the development of, and compliance with, their IHP
- inform the education setting of any changes such as type of medication, dosage or method of administration
- provide relevant in-date medicines, correctly labelled, with written dosage and administration instructions
- ensure a nominated adult is contactable at all times and all necessary forms are completed and signed
- inform the education setting if their child has/had an infectious disease or condition while in attendance.

Pupils

It is vital that pupils are actively involved in the planning of support and management of healthcare needs. Meeting the individual's needs should be at the centre of decision making and processes. The UNCRC states pupils should have access to appropriate information essential for their health and development and have opportunities to participate in decisions affecting their health. They should:

- be involved in the creation, development and review of an IHP (if any). The parent and pupil may be best placed to provide information about how their healthcare needs affect them. They should be fully involved in discussions about how the pupil's healthcare needs will be met in the education setting, and contribute to the development of, and compliance with, their IHP.

The Local Authority

Local authorities should ensure education provision is available to pupils, and:

- must make reasonable adjustments to ensure disabled children and young people are not at a substantial disadvantage compared with their peers. This duty is anticipatory. For example, pupils should not be disadvantaged when leaving primary school and beginning secondary school. In practical terms this means adjustments must be planned and implemented in advance to prevent any disadvantage. Discussions around the responsibility for provision should not impact on the delivery of service, as delays could be detrimental to the education and well-being of the pupil
- must make arrangements to promote cooperation between various bodies or persons, with a view to improving, among other things, the well-being of children in relation to their physical and mental health, their education, training and recreation. When making these arrangements, local authorities should ensure appropriate agreements are in place for data sharing. This could be through working within the Wales Accord on Sharing Personal Information (WASPI) Information Sharing Protocols or Data Disclosure Agreements. Local authorities and health boards have WASPI coordinators who can support service providers to develop appropriate agreements
- must make reasonable provision of counselling services for young people aged 11–18 and pupils in Year 6 of primary school. Within schools, this provision should complement the different approaches already in place to support the health, emotional and social needs of pupils
- should work with education settings to ensure pupils with healthcare needs receive a suitable education. Where a pupil of compulsory school age would not receive a suitable education for any period because of their health, the local authority has a duty to make arrangements to provide suitable education. If a pupil is over that compulsory school age but under 18, the local authority may make such arrangements
- should provide support, advice and guidance, including how to meet the training needs of education setting staff, so that governing bodies can ensure the support specified within the individual healthcare plan (IHP) (see 'Section 3: Individual healthcare plans (IHPs)' on page 23) can be delivered effectively.

Nurses and other healthcare professionals

Healthcare and practical support can be found from a number of organisations. The school has access to a health advice service. The scope and type of support the service can offer may include:

- offering advice on the development of IHPs
- assisting in the identification of the training required for the education setting to successfully implement IHPs
- supporting staff to implement a pupil's IHP through advice and liaison with other healthcare, social care and third sector professionals.

Health advice and support can also be provided by specialist health professionals such as GPs, paediatricians, speech and language therapists, occupational therapists, physiotherapists, dieticians and diabetes specialist nurses. In addition, third sector voluntary bodies can provide advice and 11 practical support. Proactively engaging with specialist services can provide practical help when writing and implementing IHPs. They can also provide training and awareness-raising resources, including video links.

Creating an accessible environment

Local authorities and governing body will ensure the school is inclusive and accessible in the fullest sense to pupils with healthcare needs. This includes the following:

Physical access to buildings

A duty is placed on local authorities to produce a written accessibility strategy for all schools they are responsible for under the Equality Act 2010. Any such strategy is expected to address:

‘improving the physical environments of schools for the purpose of increasing the extent to which disabled pupils are able to take advantage of education and benefits, facilities or services provided or offered by the schools’ (Schedule 10, Equality Act 2010).

This strategy must relate to a prescribed period, be consulted upon, available for inspection and kept under review. Similarly, individual schools must carry out accessibility planning and are under a duty to prepare an accessibility plan following the same principles as the strategies prepared by the local authorities.

Reasonable adjustments

The Equality Act 2010 places a duty on learning establishments to make ‘reasonable adjustments’ for pupils who are disabled as defined by the Act. In regard to these pupils, auxiliary aids or services (with the appropriate number of trained staff) must be provided.

Day trips and residential trips

The Governing Body will ensure the school actively supports all pupils with healthcare needs to participate in trips and visits. Governors are aware of their legal requirements to make reasonable adjustments to trips and residential visits ensuring full participation from all pupils.

Staff should be aware of how a pupil’s healthcare needs may impact on participation, and seek to accommodate any reasonable adjustments which would increase the level of participation by the pupil. Staff will consider how to accommodate the sharing of personal information with third parties if necessary for off-site activities (in compliance with the Data Protection Act 1998 and in respecting the pupil’s right to

privacy). This may include information about the healthcare needs of pupils, what to do in an emergency and any additional support, medication or equipment needed.

Social Interactions

The Governing body will ensure the involvement of pupils with healthcare needs is adequately considered in structured and unstructured social activities, such as during breaks, breakfast club, productions, after-hours clubs and residential visits.

The school will make all staff aware of the social barriers pupils with healthcare needs may experience and how this can lead to bullying and social exclusion. A proactive approach is applied to remove any barriers.

Exercise and physical activity

The school fully understands the importance of all pupils taking part in physical activities and staff will make appropriate adjustments to sports and other activities to make them accessible to all pupils, including after-hours clubs and team sports.

Staff will be made fully aware of pupils' healthcare needs and potential triggers. They should know how to respond appropriately and promptly if made aware that a pupil feels unwell. They should always seek guidance when considering how participation in sporting or other activities may affect pupils with healthcare needs.

Separate 'special provisions' for particular activities should be avoided, with an emphasis instead on activities made accessible for all. Where this might not be possible, advice from healthcare or physical education professionals and the pupil should be sought.

Staff should also understand that it may be appropriate for some pupils with healthcare needs to have medication or food with them during physical activity; such pupils should be encouraged to take the medication or food when needed.

Food management

Where food is provided, consideration will be given to dietary needs of pupils, e.g. those who have diabetes, coeliac disease, allergies and intolerances.

Where a need occurs, the school will in advance provide menus to parents and pupils, with complete lists of ingredients and nutritional information. Gluten and other intolerances or allergens must be clearly marked. Providing information will help facilitate parent and catering teams' collaborative working. This is especially important when carbohydrate counting is required.

Consideration will be given to availability of snacks. Sugar and gluten-free alternatives should always be made available. As some conditions require high calorific intake, there should always be access to glucose-rich food and drinks.

Food provided for trips must reflect the dietary and treatment needs of the pupils taking part. Food provided for snacks in classroom settings should also take the dietary and treatment needs of these pupils into account. While healthy school and 'no sweets' policies are recognised as important, pupils with healthcare needs may need to be exempted from these policies. Pupils needing to eat or drink as part of their condition should not be excluded from the classroom or put in isolation.

Risk assessments

Staff will be clear when a risk assessment is required and be aware of the risk assessment systems in place. They will start from the premise of inclusion and have built into them a process of seeking adjustments or alternative activities rather than separate provision.

In addition, there are duties under the Equality Act 2010 to prepare and implement accessibility strategies and plans. These strategies and plans deal with matters related to increasing participation by disabled pupils.

Sharing information

Pages 13-14 outline how the school will communicate information effectively and confidentially, including with: - teachers, supply teachers and support staff (this may include other staff such as catering staff or relevant contractors); and - parents/carers and pupils.

Procedures and record keeping

The school has procedures which state the roles/responsibilities of all parties involved in the identification, management and administration of healthcare needs. The following documentation will be collected and maintained, where appropriate.

1. Contact details for emergency services
2. Parental agreement for educational setting to administer medicine
3. Head of educational setting agreement to administer medicine
4. Record of medicine stored for and administered to an individual pupil
5. Record of medicines administered to all pupils by date
6. Request for pupil to administer own medicine
7. Staff training record – administration of medicines
8. First Aid Log

New records will be completed when there are changes to medication or dosage. The school will ensure that the old forms are clearly marked as being no longer relevant and stored in line with their information retention policy.

All administration of medication will be recorded on the appropriate forms. If a pupil refuses their medication, staff should record this and follow the defined procedures where parents will be informed of this non-compliance as soon as possible.

Storage, access and the administration of medication and devices

The school has procedures which state the roles/responsibilities of all parties involved in the identification, management and administration of healthcare needs. The following documentation should be collected and maintained, where appropriate.

1. Contact details for emergency services
2. Parental agreement for educational setting to administer medicine
3. Head of educational setting agreement to administer medicine
4. Record of medicine stored for and administered to an individual pupil
5. Record of medicines administered to all pupils by date
6. Request for pupil to administer own medicine
7. Staff training record – administration of medicines
8. Medication incident report

New records will be completed when there are changes to medication or dosage. The school will ensure that the old forms are clearly marked as being no longer relevant and stored in line with their information retention policy. These forms/templates can be found in 'Annex 2: Form templates' on page 32. Electronic versions can be found on the Welsh Government website.

Storage, access and the administration of medication and devices

The Governing Body will ensure the education setting's policy is clear regarding the procedures to follow for managing medicines and devices. Storage, access and administration procedures will always be contextual to the education setting and the requirements of the pupil. However, the following general principles should be reflected.

Supply of medication or devices

School will not store surplus medication. Parents will be asked to provide appropriate supplies of medication. These should be in their original container, labelled with the name of the pupil, medicine name, dosage and frequency, and expiry date. School should only accept prescribed medicines and devices that:

- are in date
- have contents correctly and clearly labelled
- are labelled with the pupil's name
- are accompanied with written instructions for administration, dosage and storage
- are in their original container/packaging as dispensed by the pharmacist (with the exception of insulin which is generally available via an insulin pen or a pump).

Where non-prescribed medicine is held by the school, e.g. liquid paracetamol, it should:

- be in date
- have its contents correctly and clearly labelled
- be labelled with the pupil's name
- be accompanied with written instructions for administration, dosage and storage – this can be from the parent
- be in its original container/packaging.

Storage, access and disposal

While all medicines should be stored safely, the type and use of the medication will determine how this takes place. It is important for pupils to know where their medication is stored and how to access it.

Refrigeration

Some medicines need to be refrigerated. The refrigerator temperature will need to be regularly monitored to ensure it is in line with storage requirements. Medicines can be kept in a refrigerator containing food, but should be in an airtight container and clearly labelled. A lockable medical refrigerator should be considered if there is a need to store large quantities of medicine.

Emergency medication

Emergency medication must be readily available to pupils who require it at all times during the day or at off-site activities. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline auto-injectors (pens) should be readily available to pupils and not locked away. This is particularly important to consider when outside of the education setting's premises, e.g. on trips. If the emergency medication is a controlled drug it should be kept as securely as possible so as to minimise the risk of unauthorised access while also allowing quick access if this might be necessary in an emergency. For example, keys should not be held personally by a member of staff. A pupil who has been prescribed a controlled drug may legally have it in their possession, if they are competent to do so, and they must not pass it to another pupil or other unauthorised person. Monitoring may be necessary. Where staff administer emergency medication to a pupil, this should be recorded.

Disposal of medicines

When no longer required, medicines should be returned to parent/carers to arrange safe disposal. Sharp boxes must always be used for the disposal of needles and other sharp instruments, and disposed of appropriately.

Administration of medicines

- where the pupil is under 16, administration of prescribed or non-prescribed medicines requires written parental consent, unless Gillick competence is recorded. The administration of all medication should be recorded.
- Where medication is prescribed to be taken in frequencies which allow the daily course of medicine to be administered at home, parents should seek to do so, e.g. before and after school and in the evening. There will be instances where this is not appropriate.
- Pupils under 16 should never be given aspirin or its derivatives unless prescribed to them.
- Self-medication is the school's preferred model. However, it may need to be supervised in accordance with the pupil IHP.
- Medication should only be administered by suitably trained staff. The movement and location of these trained staff should always be in conjuncture with the pupils they support.
- Staff should check the maximum dosage and the amount and time of any prior dosage administered.
- The education setting should have an intimate care policy. It should be followed, unless alternative arrangements have been agreed, and recorded in the pupil's IHP.
- If a pupil refuses their medication, staff should record this and follow their defined procedures informing parent/carers as soon as possible. If a pupil misuses any medication, their parent/carers should be informed as soon as possible. The education setting should ask parent/carers to seek healthcare advice as appropriate. If parent/carers cannot be contacted immediately, staff need to consider seeking immediate healthcare advice.
- Staff involved in the administration of medication should be familiar with how pupils consent to treatment. Further information on this from the Welsh Government can be found in the *Patient Consent to Examination and Treatment – Revised Guidance* (NHS, 2008).

All staff supporting off-site visits will be made aware of pupils who have healthcare needs. They will receive the required information to ensure staff are able to facilitate an equal experience for the pupil. This information may include health and safety issues, what to do in an emergency and any other additional necessary support that the pupil requires, including medication and equipment.

Emergency procedures

The Governing Body will ensure a policy is in place for handling emergency situations. Staff know who is responsible for the policy, nominated first aiders and how to deal with common healthcare needs. In situations requiring emergency assistance, 999 should be called immediately. The location of pupils' healthcare records and emergency contact details should be known to staff.

Where a pupil has an IHP, this should clearly define what constitutes an emergency and explain what to do. Staff will be made aware of emergency symptoms and procedures.

Other pupils in the education setting should also know what to do in general terms in an emergency, such as to inform a member of staff immediately. If a pupil needs to be taken to hospital, a staff member should stay with the pupil until a parent arrives. This includes accompanying them in an ambulance to hospital. The member of staff should have details of any known healthcare needs and medication.

Training

The Governing Body will ensure staff who volunteer or who are contracted to support those with healthcare needs are provided with appropriate training. The Governing Body will also ensure their policies clearly set out how a sufficient number of these staff will be identified and supported.

When assisting pupils with their healthcare needs, it should be recognised that for many interventions no specialist training is required and the role of staff is to facilitate the pupil to meet their own healthcare needs.

IHPs may reflect complex needs requiring staff to have specific information and training. This training may also be in the use of aids such as hearing aids (staff could be shown how to change batteries) and various adaptive technologies. If these have been instigated by health professionals, they can be asked to provide advice suitable for education settings as well as pupils and families.

Training provided will be sufficient to ensure staff are competent, have confidence in their ability to support pupils and fulfil IHP requirements. Crucially this training should involve input from the pupil and parent/carers, who often play a major role in providing information on how needs can be met. However, parent/carers should not be solely relied upon to provide training about the healthcare needs of their child.

If a pupil has complex needs, input may be needed from healthcare services and the local authority who will be able to advise and signpost to further training and support.

All staff, irrespective of whether they have volunteered to assist or support pupils with healthcare needs, may come into contact with pupils who have healthcare needs. It is therefore advisable that all staff have a basic understanding of common conditions to ensure recognition of symptoms and understand where to seek appropriate assistance.

The school aims to raise awareness of common conditions through regular training and updates. New and temporary staff should be made aware of what preventative and emergency measures are in place so staff can recognise the need for intervention and react quickly.

If the trained staff who are usually responsible for administering medication are not available, the IHP should set out alternative arrangements. This also needs to be addressed in risk assessment and planning of off-site activities.

Qualifications and assessments

Efficient and effective liaison is imperative when pupils with healthcare needs are approaching assessments, including those undertaking examinations in hospital or at home. Liaison between the school and the hospital teacher or home teacher is most important, especially where the pupil is moving from education setting or home to the hospital on a regular basis.

Awarding bodies may make special arrangements for learners with permanent or long-term disabilities and learning difficulties, or temporary disabilities and illnesses, who are taking public examinations such as GCSEs or A levels. Applications for special arrangements should be submitted by schools to the awarding bodies as early as possible. Full guidance on the range of special arrangements available and the procedures for making applications is given in the Joint Council for Qualifications' circulars Adjustments for candidates with disabilities and learning difficulties (2016)¹ and A guide to the special consideration process (2016)², which are both accessible from the Joint Council for Qualifications' website³.

Adjustments, adaptations or additional time for learners taking the National Reading and Numeracy Tests should be based on normal classroom practice for particular needs. Teachers are expected to use their professional judgement to support learners. Guidance is provided in the current National Reading and Numeracy Tests – Test administration handbook⁴.

Education other than at school (EOTAS)

Governors are aware that the support pupils receive during an episode of illness could be in hospital, a PRU or at home. Local authorities have a duty (sections 19(1) and 19(4) of the Education Act 1996) to make arrangements for the provision of suitable education for all children and young people of compulsory school age.

A pupil who is unable to attend this school because of their healthcare needs should have their educational needs identified, and receive educational support quickly so they continue to be provided with suitable education. This means education suitable to the age, ability, aptitude of the pupil and any additional learning needs (ALN) they may have. The nature of the provision should be responsive, reflecting the needs of what may be a changing health status.

The local authority is unlikely to provide education at home for pupils who are ill for very short periods of time, as their education setting should be able to provide appropriate support. However, they should take into account the way in which the absence is likely to affect the pupil on their return to education. In the case of a short absence (likely to last for less than 15 school days) the school will provide work to be completed at home, if the pupil's condition permits, and support the pupil to catch up on their return. The local authority should be ready to make arrangements for pupils in cases where it is clear that the pupil is likely to be absent from school for a significant period, e.g. more than 15 school days, whether consecutive or cumulative over the course of an academic year. However, the local authority might still need to make arrangements if a shorter absence is anticipated, depending upon the circumstances.

Where absences are anticipated or known in advance, close liaison between the school and local authority will enable the EOTAS service to be provided from the start of absence.

The local authority should take into account any period of education provided in hospital when considering whether it needs to provide EOTAS for a pupil and what to provide. If the pupil has been in hospital and has received tuition there, their curricular progress and experiences may be different to that of their peers in school. Even so, as much continuity as possible should be ensured. The local authority should provide as many lessons as the pupil's condition allows, and as is beneficial, taking into account what is suitable for the pupil. It may be necessary to give particular consideration to a pupil who is on a course leading to qualifications.

The local authority should have a written policy regarding EOTAS for pupils with healthcare needs. Policies should include arrangements for the service and the way it is staffed, the timing of the provision, and a named person who parents, hospital teachers and others should contact. The policy should make links with related services in the local authority such as those for ALN and other local authority support services, educational psychologists, the Education Welfare Service (EWS) and PRUs.

Monitoring and evaluation of EOTAS should form a key element in the local authority's strategies. It should seek to ensure new developments are taken on board, levels of education are of a sufficient standard and provision represents good value for money.

Cooperation between education, health and administrative staff in hospital is essential. The aim should be to achieve the greatest possible benefit for the child or young person's education and health, which should include the creation of an atmosphere conducive to effective learning.

Close liaison between home/hospital teachers and mainstream teachers underpins the provision of an effective educational programme for the pupils. However, parents can also act as a valuable link.

Pupils with complex healthcare needs may be discharged from hospital with a written care plan. Where this happens, the written care plan should be integrated into any IHP.

School transport

Governors are aware of the statutory duties on local authorities, Headteacher's and governing bodies in relation to pupils travelling to the place where they receive their education or training. For example, depending upon the circumstances, local authorities may need to arrange home-to-school transport for a pupil, or provide appropriately trained escorts for such journeys to facilitate the attendance of a pupil. Information and guidance on this is set out in the *Pupil Travel: Statutory Provision and Operational Guidance* (2014) document.

Reviewing policies, arrangements and procedures

The Governing Body will ensure all policies, arrangements and procedures are reviewed regularly by the education setting. IHPs may require frequent reviews depending on the healthcare need – this should involve all key stakeholders including, where appropriate, the pupil, parents, education and health professionals and other relevant bodies.

Insurance

The Governing Body will ensure an appropriate level of insurance is in place to cover the setting's activities in supporting pupils with healthcare needs.

Complaints procedure

If the pupil or parent is not satisfied with the school's health care arrangements they are entitled to make a complaint. The governing body has published our complaints policy on the school website and copy is available to all parents.

If the complaint is Equality Act 2010-/disability-related, then consideration of a challenge to the Special Education Needs Tribunal for Wales (SENTW) can be made.

Individual Healthcare Plans

IHPs set out what support is required by a pupil. They do not need to be long or complicated. Governing bodies should ensure their healthcare needs policy includes information on who has overall responsibility for the development of the IHPs. IHPs are essential where healthcare needs are complex, fluctuating, long term or where there is a high risk that an emergency intervention will be needed. However, not all pupils with healthcare needs require an IHP and there should be a process in place to decide what interventions are most appropriate. The following diagram outlines the process for identifying whether an IHP is needed:

Identify pupils with healthcare needs

- Pupil is identified from enrolment form or other route
- Parent/Carer or pupil informs education setting of healthcare need
- Transition discussions are held in good time

Gather Information

- If there is potential need for an IHP, the education setting should discuss this with the parent/care and pupil

Establish if an IHP should be made

- The education setting should organise a meeting with appropriate staff, the parents/carers, the pupil and appropriate clinicians to determine if the pupil's healthcare needs require an IHP, or whether this would be inappropriate or disproportionate. If consensus cannot be reached, the Headteacher should take the final decision, which can be challenged through the complaints procedure

If an IHP should be made

- The education setting, under the guidance of the appropriate healthcare professionals, parents and the pupil, should develop the IHP in partnership
- The education setting should identify appropriate staff to support the pupil, including identifying any training needs and the source of training, and implement training
- The education setting should circulate the IHP to all appropriate individuals.
- The education setting should set an appropriate review date and define any other triggers for review

In most cases, especially concerning short-term illnesses such as those requiring a course of antibiotics, a detailed IHP may not be necessary. In such circumstances it

may be sufficient to record the name of medication, dosage, time administered and any possible side effects.

These procedures should be confirmed in writing between the pupil (where appropriate), the parent/carers and the education setting.

However, when a pupil has continual or episodic healthcare needs, then an IHP may be required. If these needs are complex and the pupil is changing settings, then preparation should start early to help ensure the IHP is in place at the start of the new term.

Roles and responsibilities in creation of IHPs

IHPs do not need to be complex, but they should explain how the pupil's needs can be met. An IHP should be easily accessible to all who need to refer to it, while maintaining the required levels of privacy. Each plan should capture key information and actions required to support the pupil effectively. The development of detailed IHPs may involve:

- the pupil
- the parent/carers
- input or information from previous education setting
- appropriate healthcare professionals
- social care professionals
- the Headteacher and/or delegated responsible individual for healthcare needs across the setting
- teachers and support staff, including catering staff
- any individuals with relevant roles such as a first aid coordinator, a well-being officer, and special educational needs coordinator (ALNCO).

While the plan should be tailored to each individual pupil, it may include:

- details of the healthcare need and a description of symptoms
- specific requirements such as dietary requirements, pre-activity precautions (e.g. before physical education classes)
- medication requirements, e.g. dosage, side effects, storage requirements, arrangements for administration
- an impact statement (jointly produced by a healthcare professional and a teacher) on how the pupil's healthcare condition and/or treatment affects their learning and what actions are required to mitigate these effects
- actions required
- emergency protocols and contact details
- the role the education setting can play, e.g. a list of things to be aware of
- review dates and review triggers
- roles of particular staff, e.g. a contact point for parents, staff responsible for administering/supervising medication, and arrangements for cover in their absence

- consent/privacy/sensitive information-sharing issues
- staff training needs, such as with regard to healthcare administration, aids and adaptive technologies
- record keeping – how it will be done, and what information is communicated to others
- home-to-school transport – this is the responsibility of the local authority, who may find it helpful to be aware of the pupil's IHP and what it contains, especially in respect of emergency situations.

The aim of the plan is to capture the steps which need to be taken to help a pupil manage their condition and overcome any potential barriers to participating fully in education. Those devising the plan should agree who will take the lead, but responsibility for ensuring it is finalised and implemented rests with the education setting. Many third sector organisations have produced condition-specific template IHPs that could be used.

The Governing Body and healthcare professionals will ensure the plans are reviewed at least annually or more frequently should there be new evidence that the needs of the pupil have changed. They should be developed with the best interests of the pupil in mind and ensure the education setting, with specialist services (if required), assess the risks to the pupil's education, health and social well-being.

Where a pupil has an ALN the IHP should be linked or attached to any individual education plan or relevant support plan, Statement of SEN, or learning and skills plan.

Coordinating information with healthcare professionals, the pupil and parents

The way in which a pupil's healthcare needs are shared with social and healthcare professionals depends on their requirements. The IHP should explain how information is shared and who will do this. This individual can be a first point of contact for parent/carers and staff and would liaise with external agencies.

Confidentiality

It is important that relevant staff (including temporary staff) are aware of the healthcare needs of their pupils, including changes to IHPs. IHPs will likely contain sensitive or confidential information. The sharing and storing of information must comply with the Data Protection Act 1998 and not breach the privacy rights of or duty of confidence owed to the individuals.

The pupil's role in managing their own healthcare needs

Pupils who are competent to do so should be encouraged to take responsibility for managing their own medicines and procedures. This should be reflected within the pupil's IHP.

Where possible, pupils should be allowed to carry their own medication and relevant devices, or be able to quickly access their medication. Some pupils may require an appropriate level of supervision.

If a pupil refuses to take their medicine or carry out a necessary procedure, staff should not force them to do so, but follow the setting's defined arrangements, agreed in the IHP. Parents should be informed as soon as possible so that an alternative arrangement can be considered and health advice should be sought where appropriate.

Record keeping

All administration of medication must be recorded on the appropriate forms. If a pupil refuses their medication, staff should record this and follow the defined procedures where parents will be informed of this non-compliance as soon as possible.

Unacceptable practice

It is not acceptable practice to:

- prevent pupils from attending an education setting due to their healthcare needs, unless their attending the setting would be likely to cause harm to the pupil or others
- prevent pupils from easily accessing their inhalers or other medication, and prevent them from taking their medication when and where necessary
- assume every pupil with the same condition requires the same treatment
- ignore the views of the pupil or their parent/carers, or ignore healthcare evidence or opinion (although these views may be queried with additional opinions sought promptly)
- send pupils with healthcare needs home frequently or prevent them from staying for normal activities, including lunch, unless this is suitably specified in their IHP
- send a pupil who becomes ill or needs assistance to school reception or a first aider unaccompanied or with someone unable to properly monitor them
- penalise a pupil for their attendance record if the absence is related to their healthcare needs. 'Authorised absences' including healthcare appointments, time to travel to hospital or appointment, and recovery time from treatment or illness should not be used to penalise a pupil in any way. This includes, but is not limited to, participation in activities, trips or awards which are incentivised around attendance records
- request access arrangements for a pupil at a late stage. They should be applied for in good time. Consideration should also be given to access arrangements in mock examinations or other tests
- prevent pupils from drinking, eating or taking toilet or other breaks whenever needed in order to manage their healthcare needs effectively
- require parent/carers, or otherwise make them feel obliged, to attend the education setting, trip or other off-site activity to administer medication or provide healthcare support to the pupil, including for toileting issues

Healthcare Needs Policy

www.strichardgwynflint.co.uk

- expect or cause a parent/carer to give up work or other commitments because the education setting is failing to support a pupil's healthcare needs
- ask a pupil to leave the classroom or activity if they need to administer
- non-personal medication or consume food in line with their health needs
- prevent or create unnecessary barriers to a pupil's participation in any aspect of their education, including trips, e.g. by requiring a parent/carer to accompany the pupil.

Annex 1: Form templates

Education settings may wish to use or adapt the forms listed below according to their particular policies on supporting pupils with healthcare needs.

Form 1 – Contacting emergency services

Form 2 – Parental agreement for education setting to administer medicine

Form 3 – Headteacher/head of setting agreement to administer medicine

Form 4 – Record of medicine stored for and administered to an individual pupil

Form 5 – Record of medicines administered to all pupils – by date

Form 6 – Request for pupil to carry/administer their own medicine

Form 7 – Staff training record – administration of medicines

Form 8 – Medication/healthcare incident report

FORM 1

St Richard Gwyn Catholic High School

Contacting emergency services

Request for an Ambulance

Dial **999**, ask for an ambulance, and be ready with the following information where possible.

1. State your telephone number.
2. Give your location as follows [St Richard Gwyn Catholic High School].
3. State that the postcode is [CH6 5JZ].
4. Give the exact location in the education setting [insert a brief description].
5. Give your name.
6. Give the name of the pupil and a brief description of symptoms.
7. Inform Ambulance Control of the best entrance and state that the crew will be met and taken to [name location].
8. Don't hang up until the information has been repeated back.

Speak clearly and slowly and be ready to repeat information if asked to.

Put a completed copy of this form by all the telephones in the education setting.

FORM 2

St Richard Gwyn Catholic High School

Parental agreement to administer medicine
